Our Solution: A Toolkit

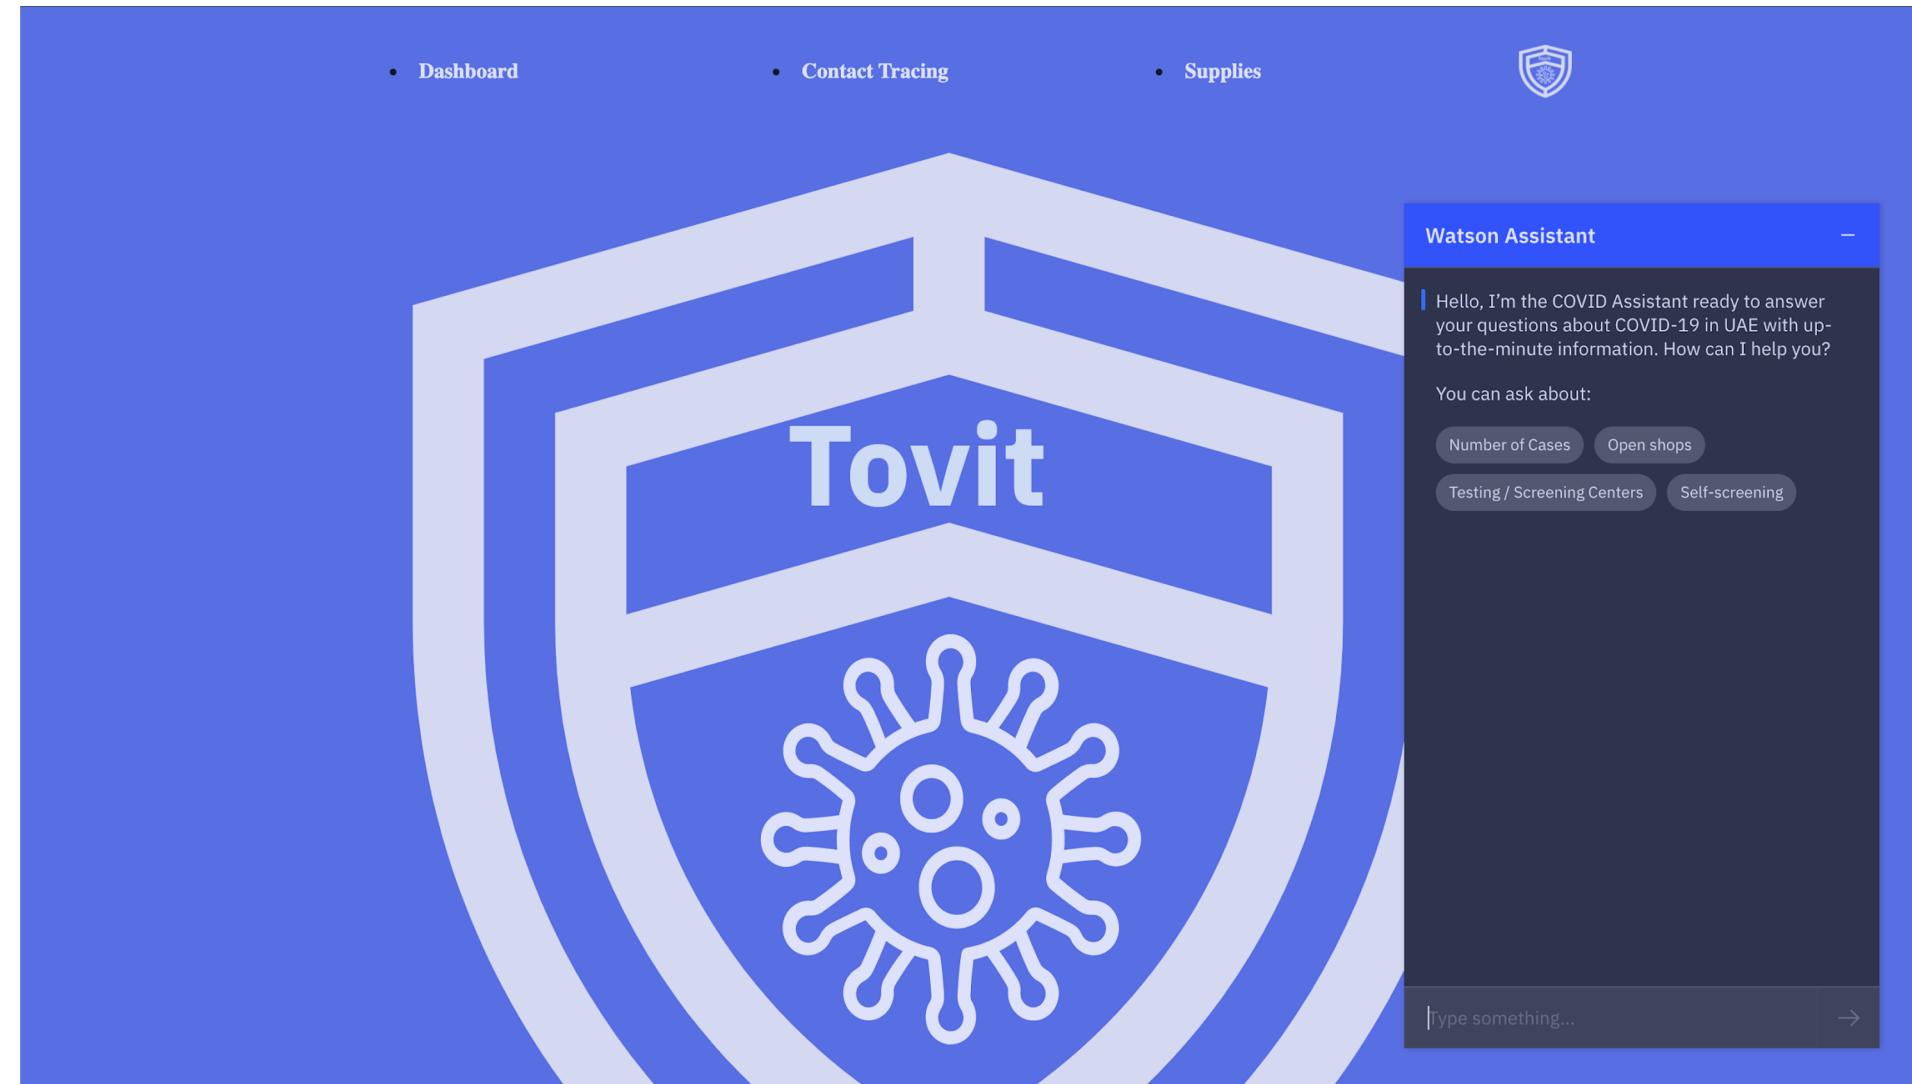

Dashboard

A dashboard talks a lot about spread and culture of COVID-19 keeping all of us informed about the statistics.

Chatbot

Chatbots give a human touch towards a solution which can also aid to getting information and educate people

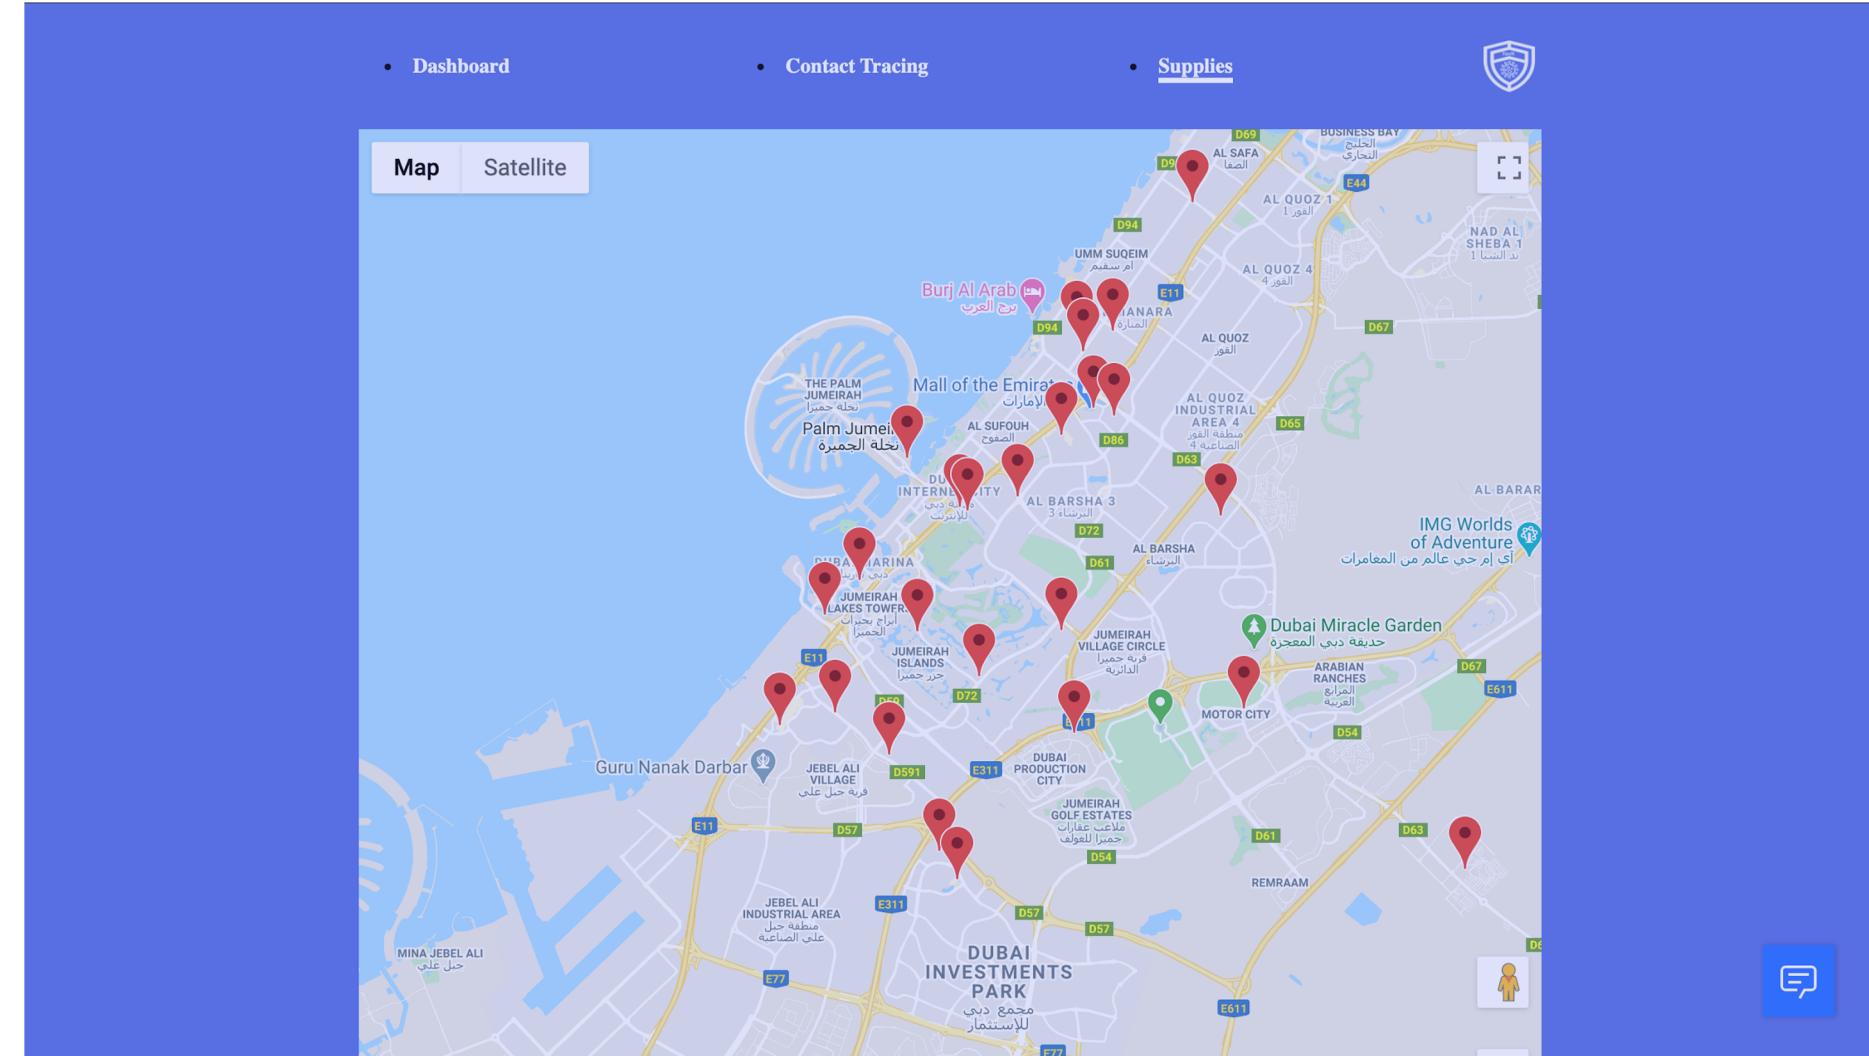

Contact Tracing

Contact tracing can help when it comes to tracing where the virus is going to spread or if a case has been detected of it within a vicinity.

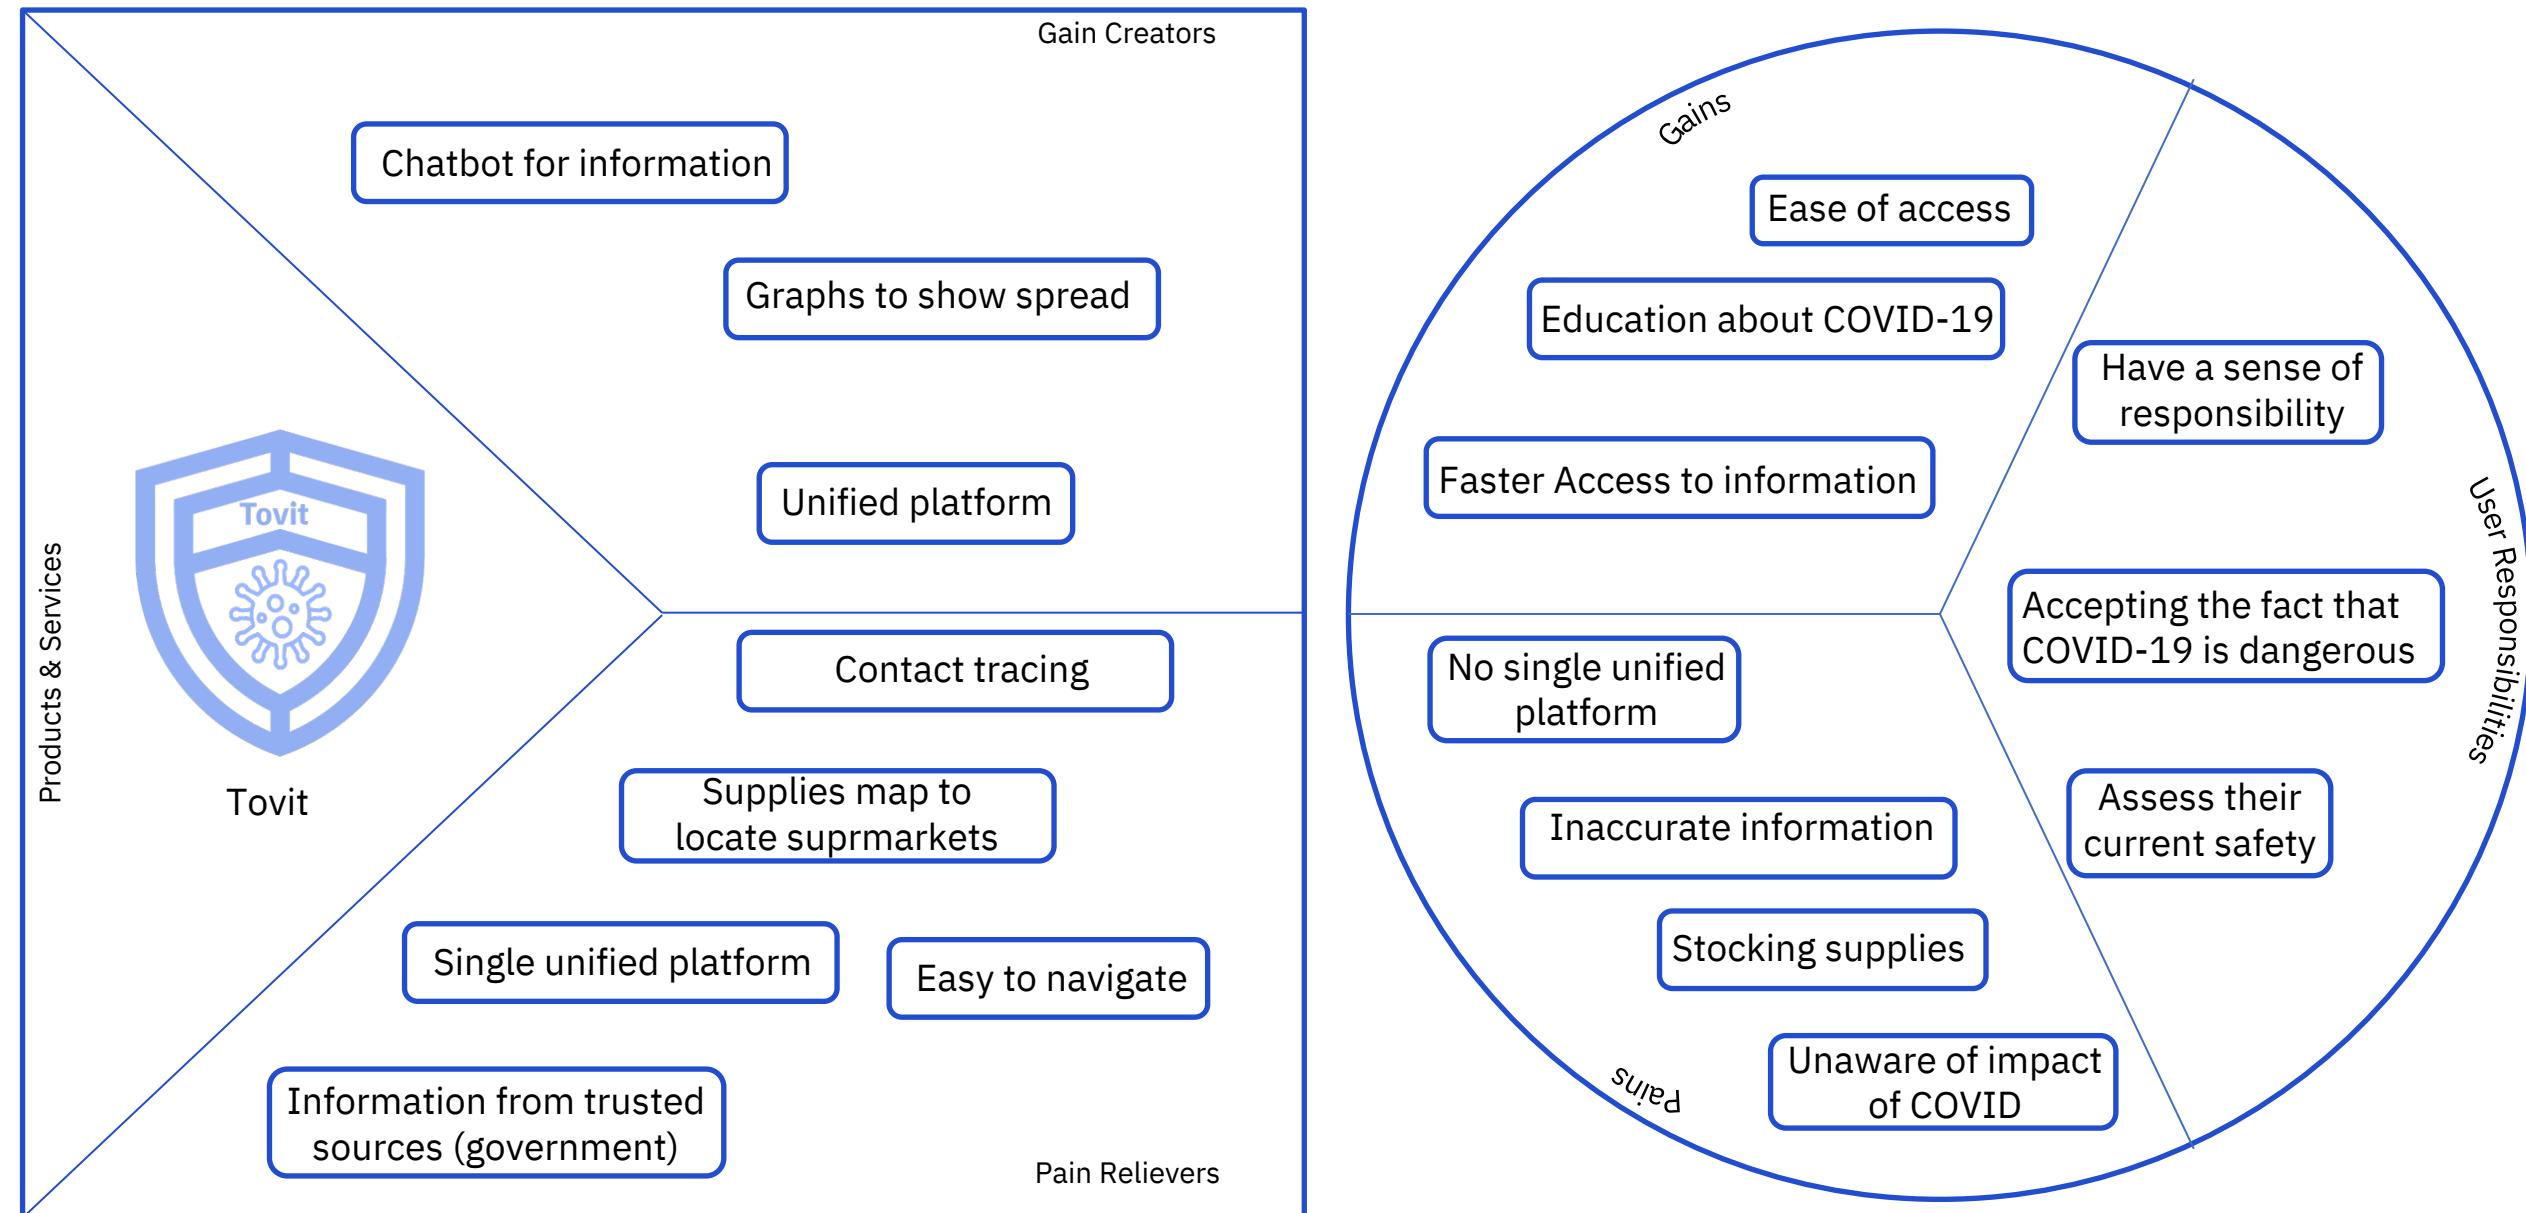

The screenshot shows a dark-themed web application for contact tracing. At the top, there is a navigation bar with three items: "Dashboard", "Contact Tracing" (which is underlined, indicating it is the active page), and "Supplies". To the right of the navigation is a shield-shaped logo. On the left side, there is a sidebar with three items: "About", "Checkpoint", and "Admin". The main content area has a dark background with white text. It displays the title "TOVIT - Contact Tracing" and a brief description: "to TOVIT - Contact Tracing. To participate in the effort to track the SARS-COV-2 virus, please scan a checkpoint whenever you are with others in a way that could transmit the virus." Below the description are two buttons: "SCAN A CHECKPOINT" with a camera icon and "HOST A CHECKPOINT" with a house icon. In the bottom right corner of the main content area, there is a small blue square icon containing a white speech bubble symbol.

Supplies Map

Supplies are a major concern when it comes to a lockdown, people usually tend to go to their usual supermarkets which could lead to infections.
